WORK EXPERIENCE

4 Years Minimum

The right & deemed fit students will be provided with 100% placement assistance

Course Description

The Bachelor Program in Safety & Health Management is a four-year programme that builds the professional competence needed to keep workplaces safe and healthy. It helps learners support their organisations in managing risk sensibly, meeting legal and regulatory requirements and achieving business objectives at the same time.

The programme combines health and safety science with management education. Learners study workplace hazards, occupational health, fire risk assessment, accident prevention, safety legislation, industrial safety and machine guarding, environmental protection, and risk, insurance and disaster management. Throughout, the focus is on practical skills that learners can apply to bring about positive change in their own workplace.

Health and safety is a growing profession across manufacturing, construction, energy and many other sectors, both in India and overseas, and this course prepares learners to take on responsible roles in the field.

Career Opportunities

Safety Officer / HSE Officer

Health & Safety Supervisor

Fire & Safety Officer

Safety Auditor / Inspector

Environmental, Health & Safety Coordinator

HSE Manager (with experience)

About Us

Aster Academy offers career-focused professional diplomas and certification programmes for students and working professionals. Our courses combine flexible online learning with online examinations, supported by faculty and academic mentors who guide learners from enrolment through to certification.

Every programme is designed around the skills employers look for, so our learners finish ready to grow in their current role or step confidently into a new one.
