- Online learning & online exams
- Industry-designed curriculum
- Aligned with international standards

Understand markets, money and the forces that drive economies.

COURSE DESCRIPTION

The Bachelor Program in Arts – Economics at Aster Academy is a three-year programme designed to provide a broad general education, with an emphasis on the skills and knowledge needed to understand how the economy works, from individual markets and prices to national and international economies.

Over three years, learners study microeconomics, price theory, the Indian economy and the economics of financial markets, then macroeconomics, international economics, quantitative techniques for economic analysis and financial economics, and on to statistical methods, introductory econometrics, public economics, the economic history of India, and development & environmental economics. Management, communication and organisational behaviour subjects round out the programme.

An economics degree is a strong foundation for careers in finance, banking, data analysis, investment and business research, and for further study for those who want roles directly in economics. Delivered through our flexible online learning ecosystem, with a fast-track option, the programme is designed by industry experts and aligned with international standards.
