COURSE DESCRIPTION

The Advanced Diploma in Electrical Engineering is a two-year program that teaches the application of electromagnetism, electronics and electricity across modern industry. Electricity has become an indispensable part of everyday life, and the market for skilled electrical professionals continues to grow in power generation, manufacturing, infrastructure and renewable energy.

In the first year, students build a strong base in electrical engineering, engineering drawings, basic and digital electronics, electrical machines and safety at the workplace. The second year moves on to circuit analysis, power system instrumentation, generation of electrical power, network analysis and synthesis, devices and circuits, and signals and systems. Graduates are prepared for roles such as electrical supervisor, maintenance engineer, power plant technician, electrical design assistant and site engineer.
